

Soyuzlesprom LLC

Wholesale deliveries of logging products from the Northern forests of the Arkhangelsk region

About company

Since 2016, Soyuzlesprom LLC has been selling the best Northern timber harvested in the Arkhangelsk region in the North-Western region of Russia. Timber is sawn on modern equipment by experienced staff in order to ensure compliance with the strict quality requirements of our customers.

Sawmilling is performed on modern equipment (manufactured in Germany and Poland, 2018).

The drying process is provided by six drying chambers «Technowood» (manufactured in Finland).

OUR SERVICES

Providing support for export shipment of lumber

Preparation of the contract

Sale of sawn timber under the Commission's export agreements under existing contracts

Customs clearance of export shipments concluded under Commission agreements

Consulting on foreign economic activities

Convenient shipment from a warehouse for temporary storage of products in St. Petersburg.

Organization of profitable logistics for transportation of sawn timber or pellets by road or by sea from the port of St. Petersburg, Russia.

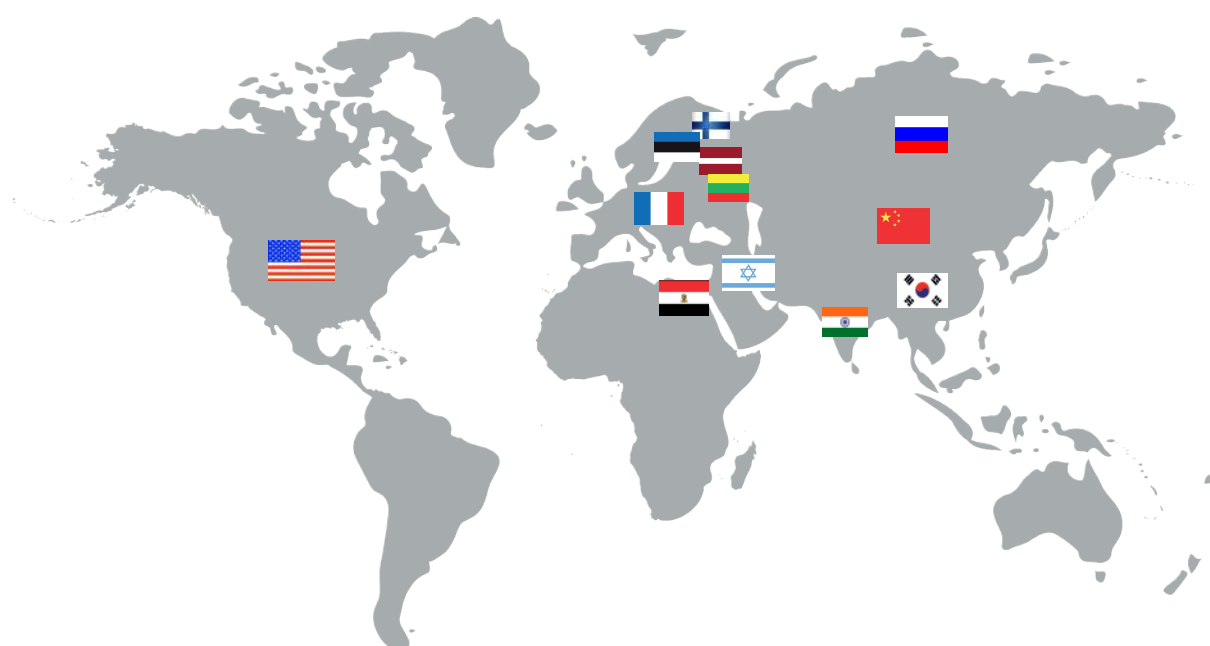

Delivery

- ✓ **Soyuzlesprom LLC** offers to supply sawn timber (Spruce, Birch) to the domestic market of Russia, for export to the EU, the Middle East, North Africa, Korea, and China.
- ✓ The goods are shipped by road from a warehouse in Plesetsk / Saint Petersburg or in containers by sea from the port of Saint Petersburg, Russia.

Packaging

- The products are packaged in tight packages of 1.1 x 1.1 x L (m)
- The package is marked on three sides with specification: the package number, volume (V) m³; length (L) m; size (thickness x width, mm); grade, number of pieces
- The packaging ensures the safety of the material during transportation. The package is covered with an opaque plastic film on five sides
